

CITY OF THE VILLAGE OF CLARKSTON  
**Historic District Commission**

# **Memorandum of Administrative Approval**

**September 11, 2020**

Plans for: 66 East Washington  
Applicant/Building Representative: Brett Battishill – owner

Pursuant to an Application for Work Permit within the Clarkston Historic District filed on September 5, 2020, commissioners Jim Meloche and Michael Moon visited the work site and inspected the porch with decking removed. The applicant noted that significant damage had been caused by rodents tunneling under the porch, entering the basement through the foundation, and infiltrating other parts of the home. On the next day, commissioners Meloche and Melissa Luginski visited the site a second time to evaluate progress, and to more thoroughly review the case.

What began as a report of a homeowner doing renovations without HDC review, is determined to be mitigation of rodent infiltration and ultimate restoration of the porch surface with tongue-and-groove decking similar to the original.
